

D-ended, elongated sightglass type LSGRR 316 Ti - 304 -2,5-2-SL-8903-KLINGERSil-Silicone. Version with blind tappings, base and cover flange in stainless steel, PN 2,5, glass plate to DIN 8903, seals KLINGERSil C4400 / silicone, dimensions 341 x 116 mm.

Standard versions

### Application:

Elongated sightglasses VETROLUX® of the series LSG / LSGR / LSGRR may be used to observe the interior of reactors, columns, silos, vessels, storage tanks, pipelines or as liquid level indicators. They are delivered ready to be welded into or onto a vessel wall, complete with appropriate seals, glass plate and cover bolts. The D-end shape facilitates easier machining of the vessel wall prior to welding in the unit.

### Operating conditions:

Nominal pressure 2,5 / 6 / 10 / 25 bar (see table overleaf)  
Vacuum

**Note: The nominal pressure indicated refers to the design base of the sightglass. When welded into the vessel concerned, the base frame becomes part of the vessel wall. It is necessary, therefore, that appropriate strength calculations are made on all vessels concerned with respect to the design pressure and size of the vessel and in accordance with the relevant design code. If found to be necessary, reinforcement of the vessel wall has to be carried out.**

Operating temperatures:

100 °C max. with sodium silicate glass to DIN 8903

243 °C max. with borosilicate glass to DIN 7081

Note: The above indicated temperatures refer to the use of unprotected glass plates, with no protective mica sheets.

### Standard materials:

Base flange:	Boiler plate RSt 37-2 / HII / AISI 316 Ti / AISI 316 L
Cover flange:	Boiler plate RSt 37-2 / HII / AISI 304 / AISI 316 Ti / AISI 316 L
Glass plates:	Sodium silicate to DIN 8903
(Transparent)	Borosilicate to DIN 7081
Seals:	KLINGERSil C4400
	EPDM
	Silicone
	PTFE
Cover bolts	Carbon steel, zinked, quality 8.8
to DIN 912:	Stainless steel A2-70

Other materials on request.

### Certificates:

To be supplied against extra charge to DIN EN 10204.

### Standard versions: (see left)

- Base flange with bolt tappings drilled through (dimensions see table overleaf), type designation – DB
- Base flange with blind tappings, type designation – SL
- Base flange with radiused back (to correspond to vessel radius), type designation – R

### Options:

- Version with double glasses (**not** available for PN 25).
- Fluted glass plate for liquid level indication (**only** available for PN 25).
- Special dimensions.
- Closed back (base flange) version with drilled and tapped holes at the ends for pipe connections so that the unit may be used as an external gauge of a liquid level.

### Type designation:

- Series LSG: Base and cover flange in boiler plate RSt 37-2
- Series LSGR: Base flange in stainless steel  
Cover flange in boiler plate RSt 37-2
- Series LSGRR: Base **and** cover flange in stainless steel

### Ordering example:

For an elongated, D-ended sightglass of nominal pressure 10 with base and cover flange in AISI 316 / AISI 304 and the base flange in version b) with blind tappings together with a glass plate of sodium silicate to DIN 8903 and overall dimensions of 350 x 80 mm, seals PTFE base side, KLINGERSil C4400 cover side, cover bolts A2-70, the correct designation would be:

1 piece type LSGRR 10-3, 1.4571 / SL - PTFE - 8903 - C4400 -1.4301 - A2.
